SUMMARY

Full-stack developer and ML enthusiast specializing in end-to-end production systems spanning blockchain, geospatial, and machine learning applications. Developed and deployed 3 production-grade projects including tamper-proof evidence platforms with Ethereum smart contracts, GIS applications serving 26+ POIs, and ML pipelines achieving 77.6% accuracy on 1.6M+ datasets. Proficient in building API-driven architectures, real-time data processing systems, and scalable web applications.

PROJECTS

Evidence Integrity System Using Blockchain 2025 – 2026

Node.js, Express, MongoDB, Solidity, Ethereum, Ethers.js, Hardhat, JavaScript

- Engineered tamper-proof digital evidence platform using SHA-256 hashing, Ethereum smart contracts, and JWT-based role-based access control with real-time blockchain verification.
- Implemented comprehensive audit trail logging with timestamps and IP tracking; deployed smart contracts via Hardhat with 12 REST API endpoints and MongoDB metadata storage.

Karjat Trek Guide — Sahyadri Explorer 2025 – 2026

Python (Flask), JavaScript, Leaflet.js, OpenStreetMap

- Built full-stack GIS application for trekking region with 26 POIs, 4 routes (34 km), and 12 REST API endpoints; implemented Haversine calculations, real-time weather integration, and emergency service proximity lookup.
- Extracted live geospatial data from OpenStreetMap via Overpass API with admin interface for non-technical POI management.

Sentiment Analysis AI Application 2025 – 2026

Python (Streamlit), Scikit-learn, Pandas, Numpy, Matplotlib

- Developed end-to-end sentiment classifier trained on 1.6M tweets achieving 77.6% accuracy using TF-IDF and Logistic Regression with multi-dataset support (Twitter + IMDb reviews).
- Built interactive Streamlit dashboard with real-time analysis, batch CSV processing, model performance visualization, and export functionality for predictions.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, C, SQL, HTML5, CSS3

Frontend Development: HTML5, CSS3, JavaScript, Angular, Bootstrap, Responsive Web Design

Backend Development: Node.js, Express.js, Django, REST API, JSON

Databases: SQL, MySQL, MongoDB

Libraries: Numpy, Pandas, Streamlit, Scikit-learn, Matplotlib, Seaborn

Tools & Platforms: Git, GitHub, VSCode, PyCharm, npm, Postman, OpenStreetMap, Overpass API

Specializations: Web Development, Machine Learning, GIS Development, Data Analytics, Database Design

CORE COMPETENCIES

Professional Skills: Problem Solving, Analytical Thinking, Team Collaboration, Time Management, Quick Learning, Adaptability

Areas of Interest: Data Engineering, Database Systems, Data Analytics, Web Development, Machine Learning, Geographic Information Systems (GIS)

EDUCATION

Konkan Gyanpeeth College of Engineering

B.E. Information Technology | CGPA: **6.75 / 10**

Karjat, Maharashtra, India

Nov 2022 - May 2026
